

Md Fuadul Islam(Fuad)

Software Engineer | LLM Systems & Evaluation

🏠 Tampa, Florida, USA ✉️ fuad.mdfuadul@gmail.com

🌐 fooaad.github.io 🌐 fooaad 🎓 Scholar

Education

Islamic University of Technology

B.Sc. in Software Engineering, CGPA 3.28/4.00

Jan 2018 – May 2022

Gazipur, Bangladesh

Test Scores

IELTS Academic

Overall Band 7.5

Jul 2026

Professional Experience

re:cruit

Feb 2026 – Jul 2026

Software Engineering Consultant (Contract)

Remote

- Built a browser-based asynchronous media pipeline (MediaRecorder → OPFS → object storage) for reliable client-side recording, upload, and playback in a real-time meeting application.
- Architected HLS streaming and transcription infrastructure integrating third-party real-time media services, with attention to latency and cost.
- Evaluated candidate LLMs for meeting transcription by comparing output quality and cost on real multi-speaker recordings, driving model selection for the production pipeline.
- Investigated approaches to speaker attribution and automated transcription in multi-speaker contexts.
- Contributed to an internal LLM-orchestrated coding agent, building the proxy integration layer for model API access.

Samsung Research & Development Institute Bangladesh

Jun 2022 – Jul 2025

Senior Software Engineer, Wearable Solution Group

Apr 2024 – Jul 2025

- Collaborated with AI engineers to analyze cognitive-interaction data from wearable devices, contributing to early Alzheimer's detection research.
- Designed experiments for collecting behavioral data from mobile usage patterns and integrated the data pipelines into the application.
- Developed Android applications from scratch using Jetpack Compose; implemented a single-activity architecture to optimize performance and user experience.

Software Engineer, Service eXperience Group

Jun 2022 – Mar 2024

- Developed and maintained an audio/video conferencing application (AT&T FirstNet) following 3GPP MCPTT standards, using UIKit, CallKit, and pttKit.
- Built and documented client-server APIs over SIP, TCP, and UDP for real-time communication across devices.
- Increased automated test coverage to over 80% with XCTest, improving product stability and release confidence.

Research Interests

Evaluation of AI-assisted coding and agentic systems; large language models and LLM orchestration; software engineering; reliability and trustworthiness of automated developer tooling.

Research Experience & Publications

IEEE - Sentiment Analysis of COVID-19 Vaccination in Bangla with Code-Mixed Text from Social Media

Dec 2022

- Co-authored the first code-mixed Bangla-English sentiment corpus from Facebook (CoVaxBD)
- Fine-tuned mBERT for Bangla text classification, achieving 97.3% validation accuracy
- Built dataset annotation pipeline using Python; led model evaluation and result analysis

Technical Skills

Languages: Python, TypeScript/JavaScript, C/C++, Swift, Kotlin, Java, SQL, Bash, HTML/CSS, LaTeX

Technologies/Frameworks: React, WebRTC, HLS, LLM API integration, Jetpack Compose, UIKit, SwiftUI, XCTest, Git

Developer Tools: VS Code, Xcode, Android Studio, Linux

Competitive Programming Experience

- Codeforces: Fuad (Max Rating: 1856, Expert), LightOJ: fuad, StopStalk: Fuad
- 24th, ICPC Dhaka Regional 2019
- 11th, LU CSE Carnival IUPC 2019
- 2× Runner-up, Intra IUT Programming Contest (2018, 2019)
- 2nd Runner-up, IUB IEEE Day Programming Contest, 2018

Extracurricular

IUT Computer Society

Senior Trainer

Jan 2020 – Jul 2022

Islamic University of Technology

- Co-ordinate contests and teach programming concepts including number theories, graph algorithms, data structures, dynamic programming etc.
